

THE VODOSTOP SYSTEM - ELECTRONIC SAFETY WATER STOP

Protection of Residential and Non-Residential Premises Against Flooding

A REAL EXAMPLE BASED ON DATA DETECTED DURING THE FIRST VODOSTOP INSTALLATION

Let us calculate water and money loss for one leaking toilet:

5 liters water/ 1 minute: 0.083 liters/sec = 298 liters/hr = 7 cubic meters/24 hrs

An average water cost Kč 60,-/2.50 EUR per cubic meter (water delivery cost in 2011 in Czech Republic)

Such water leak is so small that you may never even notice it; let us take another look:

Leak time	Leak cost in Kč/EUR	Leak in liters
1 day	420,-/17.50,-	7 000
1 week	2.940,-/122.50,-	49 000
1 month	12.600,-/525,-	210 000
1 year	151.200,-/6.300,-	2 520 000

And the above numbers are for one toilet only- is it too much? Okay, let us reduce the leak to one half:

Leak time	Leak cost in Kč/EUR	Leak in liters
1 day	210,-/8.75,-	3 500
1 week	1.470,-/61.25,-	24 500
1 month	6.300,-/262.50,-	105 000
1 year	75.600,-/3.150,-	1 260 000

Still too much? Let us take one quarter:

Leak time	Leak cost in Kč/EUR	Leak in liters
1 day	105,-/4.40,-	1 750
1 week	735,-/30.60,-	12 250
1 month	3.150,-/131.25,-	52 500
1 year	37.800,-/1.575,-	630 000

And this is one barely dripping toilet! Note that here we have a really a toilet leaking by drops!

If you install the VODOSTOP system in your home or office, all that waste and charges will be gone. Even minor leakage will be detected and water input stopped. And more- VODOSTOP will let you know about a leak and will also show you why it decided to stop water flow.

VODOSTOP system can also detect water leaks in piping running in the walls or in the ground. It offers you a full protection of the whole water system at your premises.

VODOSTOP system is also ready to protect you even if you, your family members or your employees, customers or any users forget open faucets, or do it deliberately. VODOSTOP will stop the water flow and tell you why it did.

With a larger-scale emergency in your water piping system, you are the winner with VODOSTOP system. It only needs seconds to act.

VODOSTOP system does not limit your water access or needs but it stays alert at guard.

VODOSTOP system is simply preset by you; then you can forget about it- it stays automatically at guard.

VODOSTOP system, as we illustrated above, can and will save your money and time.

VODOSTOP system gives you happy dreams and keeps your property dry!
